Fourth Convocation Ceremony of Rajasthan University of Health & Science

Differences be kept aside from the horror and heat of Inhumanity

- Governor

Jaipur, 23 January. The Governor and Chancellor has stated that the doctors on this earth are seen as another God. To keep this honour intact, the doctors should always keep themselves alert and sensitive. There may be differences from system or Government but these should be kept aside from the heat of Inhumanity. One day lock on the Hospitals disrupts the life of millions of human beings. The doctors should not become the reason of lock on the Hospitals.

The Governor Shri Singh was addressing the Convocation Ceremony of Rajasthan University of Health & Science on Tuesday in Jaipur.

Shri Singh suggested the doctors to analyse the situation from the view point that suppose they go to temple under mental stresses but on reaching, the temple is found locked, what would be their mental condition in that situation. He expressed that the person who suffers can only describe the situation under which he has passed through. Lock on the Hospital for a patient is as similar as that of not getting an opportunity of glimpses of God in the Temple. The Governor stated that may be there are lacs of problems or compulsions but the doctors should not refrain from their basic responsibilities.

The Governor reposed faith that all doctors shall play an important role in building up healthy nation and healthy society and, shall work in close coordination and harmony. There is no denying the fact that allopathic treatment is being considered as one of the most reliable methods to cure the diseases in the present era. This would not be wrong to consider the allopath being the eldest one in the family of medical pathies but this has become a customary among the Allopathic doctors that they criticise the Ayurved. This is not justified. It should be born in mind that other medical pathies are not in competition with the allopath.

He desired that Allopathic doctors should also give importance to the Homeopathy and Ayurved and if treatment to cure diseases by these methods is found scientifically true and effective, they should not hesitate to accept it. The Governor Shri Singh was of the opinion that in the diseases of cold, cough, Gastric problems, acidity etc. ayurvedic treatment is undoubtedly quite effective. The Homeopathic treatment is significant in allergy and skin diseases.

Dr. Lokesh Chandra Sharma
PRO to Governor of Rajasthan
